

Application No. 7

TEXT AMENDMENT

APPLICATION SUMMARY

Applicant/Representative:	Miami-Dade County Department of Planning and Zoning / Marc C. LaFerrier, AICP, Director
Element(s) to be Amended	CAPITAL IMPROVEMENTS ELEMENT
Requested Text Changes	In the CIE Schedules of Improvements--Tables of Proposed Projects. Modify the following currently adopted tables as indicated in the application and related information: Table 2, Aviation; Table 3, Coastal Management; Table 4, Conservation; Table 5, Drainage; Table 6, Park and Recreation; Table 7, Seaport; Table 8, Sewer Facilities; Table 9, Solid Waste Management; Table 10, Traffic Circulation; Table 11, Mass Transit; and Table 12, Water Facilities. Revise any other summary table or related text in the Capital Improvements Element as necessary to be consistent with the additions, deletions, or changes made by Part A of this application.
	Revise the Introduction and Implementation Schedules of Improvements to adopt by reference the 2009 Transportation Improvement Plan (TIP), plus the 2009 Miami-Dade Public Schools Facilities Work Program and to provide definitions of future growth and existing deficiencies
Amendment Type:	Standard Amendment – Only One Hearing Required

RECOMMENDATIONS

Staff:	ADOPT (August 25, 2009)
Planning Advisory Board (PAB) acting as Local Planning Agency:	ADOPT (October 5, 2009) FIRST READING (October 6, 2009)
Board of County Commissioners:	DEFERRED (November 4, 2009) ADOPT (December 1, 2009)

Staff recommends: **ADOPT** the proposed text amendment for the following reasons:

1. The tables presenting the proposals to update the schedules of programmed improvements in the Capital Improvements Element (CIE) appear on the following pages. The schedule for preparing these proposals is necessitated by the need to coordinate the preparation and update of the CDMP CIE and the production of the County's Capital Budget and Multi-Year Capital Plan, in particular, the formulation of the County Manager's proposed budget, which was published in July. The schedule for publishing April cycle CDMP amendment Applications reports precedes the schedule for preparing the capital budget. Thus, the updated tables of CIE projects are not finalized at the time of printing of the Applications report and are presented in this report. The recommended tables (Table Nos. 2 through 12) reflect the proposed budget.
2. In accordance with Chapter 163, Part II, Florida Statutes as modified by the Growth Management Act of 2005, the addition or deletion of projects, along with the deferral or delay the dates of construction projects, in the Schedules of Improvements of the (CIE), must be accomplished by Plan amendment. The identification of a change in the scheduled date of construction of a project in a Plan amendment is a new requirement of the Growth Management Act. Previously this change could be accomplished by adopting an ordinance. Changes to the Schedules of Improvements that do not require an amendment but may be adopted by ordinance and transmitted to the Florida Department of Community Affairs (DCA) for record keeping purposes only include the following: a) corrections and modifications concerning costs of a project already included in the adopted schedule; b) corrections and modifications concerning revenue sources; and c) acceptance of facilities pursuant to dedications, which are consistent with the plan.

As conditions and priorities in the community change, the programs of capital facilities for the respective functional areas require modification. The requested changes contained in the application were initiated by the various operating departments and include, when necessary, adjustments to the scheduling, project costs, or revenue levels and sources.

3. There are numerous reasons why operating departments propose to add or delete projects or defer or delay the dates of construction projects. Generally they do so in following their department's capital improvements strategy, which, in turn, is driven, by their functional plans and the associated element(s) of the CDMP. Most often, projects are added as needed and deleted as they are finished or are no longer needed. The scheduled date of construction of capital projects is the time construction commences or the completion date. Both the start and completion dates are essential for determining if the CDMP and maintenance of Level of Service standards are financially feasible.
4. The Department is recommending additional changes to the Schedules of Improvements to reflect state laws and regulations. To meet the requirements of Section 163.3177(3)(a) 6 of the Florida Statutes (F.S.), the projects of the Florida Department of Transportation, Turnpike Enterprise and the Miami-Dade Expressway Authority, which are in the Transportation Improvement Program for Fiscal Years 2009/2010 to 2013/2014 (TIP) of the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area and are relied on to ensure concurrency and financial feasibility, must be added to the schedule for traffic circulation. The local comprehensive plan, such as the CDMP, is now required to demonstrate financial feasibility. Rule 9J-5.016(4)(a)1.b of the Florida Administrative Code (F.A.C.) requires that the schedules demonstrate consistency with the individual elements of the comprehensive plan. The Schedules of Improvements has been revised to incorporate these changes.

5. The Department is also providing additional information to DCA in regard to committed and planned revenues to fund the Schedule of Improvements for the Capital Improvements Element. A Capital Revenue Summary by Source and a list of the relevant enforceable development agreements to finance projects funded by "Developer Fees/Donations" is included as part of this application.

Requested Text Amendments

- A. In the CIE Schedules of Improvements--Tables of Proposed Projects, modify the following currently adopted tables as indicated in the attached tables: Table 2- Aviation; Table 3-Coastal Management; Table 4-Conservation; Table 5-Drainage; Table 6-Park and Recreation; Table 7- Seaport; Table 8-Sewer Facilities; Table 9-Solid Waste Management; Table 10-Traffic Circulation; Table 11-Mass Transit; and Table 12-Water Facilities
- B. Proposed additions are listed under the heading "Proposed Additions, April 2009 CDMP Amendment Cycle". Proposed deletions are indicated by strike through and footnoted accordingly. All other Proposed Projects already exist in the CIE and remain essentially unchanged.
- C. Revise any other summary table or related text in the Capital Improvements Element as necessary to be consistent with the additions, deletions, or changes made by Part A of this application.
- D. Revise the next to last paragraph in the Introduction on pages IX-1 and IX-2 as follows¹:

Since Miami-Dade County has a large and sophisticated Capital Budget and Multi-Year Capital Plan, it is not necessary for the CIE to contain detailed financial analysis. The capital improvements contained in the CIE are a subset of the County's Capital Plan and the financial analysis contained therein is incorporated by reference in the CIE. Capital improvements associated with the construction of primary state highways, the turnpike and expressways are not addressed in the County's Capital Budget and Multi-Year Capital Plan but rather are the responsibility of the Florida Department of Transportation and the Miami-Dade Expressway Authority. To address the financial feasibility of non-county roadways that are needed to meet LOS requirements the most recent adopted Transportation Improvement Program for Fiscal Years 2008/2009/10 to 2012/13/14 (TIP) of the Metropolitan Planning Organization for the Miami Urbanized Area (MPO), specifically the sections on Primary State Highways, Turnpike Enterprise and Miami-Dade Expressway Authority, will be incorporated by reference into the CIE.

- E. Revise the Implementation Schedules of Improvements on page IX-21 as follows:

The following pages deal with the implementation of the CIE. The capital projects forthcoming from each functional element are listed for the period 2008/2009-2013/2014 2009/2010-2014/2015 along with the cost, location, expected revenues and funding source. These are the latest schedules of projects, which have been adjusted to incorporate changes adopted by the County Commission through the April 2008 amendment review cycle. Additionally, those capital improvements for non-county roadways, as listed in the Transportation Improvement Program for Fiscal Years 2008/2009/10 to 2012/13/14 (TIP) and approved by the Metropolitan Planning Organization (MPO) for the Miami Urbanized

¹ Underlined words are proposed additions. ~~Strikethrough~~ words are proposed deletions. All other words exist in the Plan and will remain unchanged.

Area on May 228, 2008⁹ are incorporated by reference into the CIE. Furthermore, those capital improvements for educational facilities, as listed in the Miami-Dade County Public Schools Facilities Work Program dated September 2008⁹ and adopted by the Miami-Dade School Board, are incorporated by reference into the CIE.

Preceding a section containing the project listings is a section containing brief narratives which describe current local practices for the particular services, presents level of service standards, if any, and discusses how capital investments are prioritized. The relationship to the Land Use Element is indicated and operating cost implications are set forth, where applicable. In all instances, project and other cost figures originate with operational departments, which have direct responsibility for, and experience in, the functional area. The basis for their cost estimates range from actual bid prices to application of standard formulae for deriving such estimates.

The capital improvements identified herein are all derived from the functional elements and fall into three categories. First, there are those projects arising from the individual elements LOS standards. These are further subdivided into those meeting existing deficiencies, those accommodating growth, or simply replacement projects. A project meets existing deficiency in an area if it provides capacity improvements necessary to satisfy LOS requirements for the current population and/or service demands. A project addresses future growth in an area if it provides capacity improvements necessary to satisfy LOS requirements for the future based on growth assumptions regarding population and/or service demands. Often, a project is a combination of deficiency correction and future capacity addition. Another class of projects has their basis in the objectives and policies of a functional element and do not have definitive LOS standards. Finally, a few projects are included which are required to mitigate unsafe or hazardous conditions. In all instances, the schedules of improvements are consistent with the individual elements.

Capital Improvements Element Schedule Modifications

During each CDMP amendment cycle, some or all of the CDMP's schedules of capital improvements may be proposed for revision for a variety of reasons. During the April cycle, typically all schedules are revised. This section briefly outlines the functional capital facility programs proposed for amendment this cycle, and explains the more significant proposed amendments recommended for approval in 2009.

The FY 2008-09 Capital Improvements Element (CIE) adopted in November 2008 contained 548 active projects with a total cost of \$20.26 billion. The largest expenditures are Transit-related projects with 28.8 percent of the total, followed closely by Water and Sewer facilities with 27.5 percent. Aviation makes up another 24.3 percent, Highways and roads 7.9 percent, Seaport close to 5.0 percent, and Park and Recreation just over 3.6 percent of total programmed expenditures. Aviation, water and sewer, and traffic projects have long been the dominant components of the CIE. Due to the injection of funding from the ½ cent transit surtax, as well as funding from the voter approved General Obligation Bond (GOB) program, the mass transit and park and recreation areas have increased their proportion in recent years.

The Schedule of Improvements for the FY 2009-10 proposed CIE has totals well below the values for the previous program, especially the expenditures. There are 443 active projects with a total cost of \$17.87 billion and six-year programmed expenditures of \$9.02 billion. Also included are 51 new projects costing \$1.22 billion with \$468.27 million planned expenditures over the six FY 2009/10 – 2014/15 periods. Again, the largest share (36.0 percent of cost) of this new CIE is in Aviation followed by Water/Sewer facilities (35.7 percent) and Mass Transit (12.9 percent).

Aviation

The aviation component has consistently been one of the largest in dollar terms since the inception of the CIE process in 1988. The Miami-Dade Aviation Department (MDAD) is responsible for planning and carrying out renovation and upgrading of existing, and construction of new facilities to meet current and forecasted commercial passenger, cargo, and general aviation demand at Miami International Airport (MIA), plus four other active General Aviation airports (GAA), and one training facility.

The currently adopted CIE (April 2008 cycle) contains eight aviation projects at a total cost of \$6.29 billion. About 39.2 percent is proposed for expenditure over the six-year program period, a percentage slightly above the previous year, with absolute expenditures about \$76.65 million higher from the previous program cycle. During the FY 2008-09 budget and multi-year capital plan, \$2.47 billion was programmed and many projects were carried out in the following areas: terminals, concourses, support facilities, cargo facilities, landside improvements, and airside improvements. However, by far the bulk of the program (77.6 percent) is to be found in the first category, a total of about \$1,914 million. Projects completed and in use at MIA include the new Runway 8L-26R, new taxiways, portions of North Terminal, Concourse H and other components of the existing terminal, as well as new concessions for passenger comfort and convenience.

For the 2009-10 budget year, this capital programming is being continued; i.e. terminal, concourse, and gate expansion at MIA along with increases in cargo handling capacity; necessary airside and landside improvements (roads and parking) and a variety of support projects, including about \$66.96 million for various improvements in the general aviation airports. For the current 2009/10–2014/15 period though programmed funding has decreased by about 45.5 percent from the previous six-year period.

Overall, the proposed April 2009-cycle Aviation Schedule of Improvements plans expenditures of almost \$1.35 billion, well below the previous program cycle. However, the total cost of the program, at \$6.44 billion, is slightly above the prior year. Almost all is funded from a combination of State and federal grants, revenue bond funds, current capital outlay and passenger facility charges. The proposed program maintains the eight active projects from the previous one and there is one proposed addition.

This new schedule of improvements embodies the strategy of emphasizing capabilities changes of MIA to handle existing and future demand levels for passengers and cargo operations in an efficient manner. The Department is engaged in a \$6.443 billion capital improvement program to make the airport a more desirable and efficient transportation center. Aeronautical activities at MIA are being enhanced by continuing construction of the North Terminal adding 1.8 million square feet of new terminal/concourse space in addition to the existing 111.7 million; the completed terminal will have 48 swing gates and the capability of handling 250 flights per day; completion date is projected in 2011. In addition, other components of the existing terminals with additional international and domestic gates along with renovated portions of existing concourses will give extra support to the passenger traffic from international flights. During 2009-10, key elements of the program are a new North Terminal, expansion of the South Terminal, improvements to the Central Terminal, construction of an elevated automated mover system known as the "MIA Mover," roadway and facilities improvements, major security modifications, and replacement of business systems.

Coastal Management

The Miami-Dade County Department of Environmental Resources Management (DERM) administers the coastal management program as reflected in Table 3 of the Schedule of Improvements. Its primary aim is beach restoration and preservation. The program focuses on initiating and coordinating federal and/or State projects essential to the protection and recreational viability of the County's ocean shoreline.

The adopted (April 2008 cycle) Coastal Management Schedule of Improvements includes four projects at a cost of \$67.52 million, with planned expenditures at \$50.63 million. Both the total cost and the six-year expenditures are much lower than the previous year's capital program. During FY 2008-09, only two beach re-nourishment projects are to be completed, one for maintenance and one for major capital projects, at a combined cost of \$18.6 million.

The currently recommended Coastal Schedule of Improvements contains three active projects with a six-year expenditure program of \$45.61 million, somewhat lower than the previous year, while total cost of the program at \$77.49 million is up by about 15 percent. There are no newly proposed projects, while there is one proposed deletion (#3); the latter due to a merge with project #4. There is one beach re-nourishment project with \$20.64 million planned expenditures over the amount in FY 2009-10.

Conservation

The Conservation Element of the CDMP provides direction for the protection and conservation of Miami-Dade County's natural resources. Projects with this purpose are included in the Conservation Schedule of Improvements of the CIE, which has emphasized protection of natural water bodies and unique endangered lands. Since the advent of the Stormwater Utility program, the focus has been heavily on major and local drainage improvements. However, as a result of changes in the Proposed Resource Allocation Plan during the previous two fiscal years, the bulk of these activities are now devoted mostly to the administrative function of the program. The presently adopted program for FY 2008-09 contains 10 projects at a total cost of \$369.25 million, with expenditures programmed at \$72.41 million. The total cost for FY 2008-09 is \$96.52 million above the previous year, but the six-year expenditures are about \$33.87 million lower from the previous program cycle.

Major activity during FY 2008-09 includes continued acquisitions of environmentally endangered lands, as the Department of Environmental Resources Management (DERM) offers to purchase more than 500 acres of such lands and provides for active restoration and preservation of wetlands and environmentally valuable uplands. A little over \$14.93 million was programmed for this purpose. The Miami River dredging project has been completed and a small number of local drainage projects have been carried out. Of the \$72.41 million to be expended during the 2008/09 – 2013/14 programming period, most was devoted to river and canal dredging and a variety of drainage improvements for the Community Rating System (CRS) program. In addition, several individual drainage projects were completed.

The April 2009-cycle recommended program for Conservation continues these efforts at about the same scale as the last year from the number of ongoing projects perspective. This is due to the transfer of drainage related activities to Public Works Department. The current program will cost \$275.12 million, which is a significant drop from the previous year, with only \$52.41 million planned to be expended over the six-year period. There are eight active projects and two proposed deletions; both project numbers 3 and 10 have been completed. There is only one proposed addition.

Drainage

The Miami-Dade County Public Works Department has been responsible for eliminating or controlling localized stormwater drainage problems, and has an ongoing program directed to that purpose. As a result of the recommendations made during the summer of 2006, all drainage, design, and construction activities formerly housed in DERM were transferred to the Public Works Department. This includes secondary canal maintenance, street swiping, and drain cleaning funded by the Stormwater Utility program.

The currently adopted (April 2008 cycle) Drainage Schedule of Improvements contains 53 projects costing a total of \$126.33 million, with six-year programmed expenditures at the \$74.81 million level. As a result of the abovementioned transfer of drainage improvements activities from DERM to Public Works Department, the April 2009 recommended capital program for Drainage includes more projects than the past two years. However, both total cost and programmed expenditures are much lower than the levels of last year. With the drainage projects from DERM added, the proposed plan will have a total cost of \$98.87 million. Over the six-year program, \$60.54 million exclusively for roadway drainage improvements will be expended. There are 35 ongoing projects with eight newly proposed ones. Eighteen projects are being deleted; project numbers 4, 9, 24, 25, 49, and 50 all due to completion. Funding sources for project numbers 6, 12, 13, 16, 19, 20, 21, 22, 36, and 46 have been assigned to other higher priority projects. Project #52 is being deleted due to lack of funding and construction of project #8 is being deferred to be completed in FY 2009-10.

Park and Recreation

The Miami-Dade County Park and Recreation Department builds, maintains, operates or manages an extensive and diversified system of parks, other recreational and cultural facilities along with open spaces, to serve the people of Miami-Dade County. Department facilities range from tot-lots and local parks serving unincorporated area neighborhoods, to metropolitan and regional parks, golf courses, marinas, and the Miami Metrozoo that serve the entire County. Overall, the Department manages 252 parks encompassing more than 12,500 acres of land. It also is responsible for historic sites and nature preserves.

Historically faced with huge unfunded capital needs, in recent years this situation has been somewhat relieved. This is due to the approval, late in 1996, of the Safe Neighborhood Parks (SNP) bond program and the Mayor's FY 1998-99 Quality Neighborhoods Improvement Program (QNIP). The former is exclusively for parks, while the latter also funds other local capital projects such as sidewalks and street resurfacing. Aside from these sources, the Building Better Community (BBC) Bond Program has also provided additional funding to meet the Departments' capital needs.

Utilizing these and a wide assortment of other funding sources, the Department is proceeding with a capital program that is less ambitious than previously anticipated. The currently adopted FY 2008-09 capital budget and multi-year plan shows programmed expenditures at \$370.64 million with a total cost of \$761.26 million. During the first year (2008-09), the Department was budgeted to make improvements at several projects, the largest being the Miami Metrozoo – Construction of Phase III Zoowide Improvements and Entry, as well as Miami Metrozoo Additional Improvements at combined expenditures of \$9.36 million.

In light of the changes in current economic conditions and related needs, the presently recommended Park and Recreation Schedule lists 106 active projects, at a total cost of \$620.62

million and programmed outlays of \$325.96 million. These projects are covering a wide range of activities, most relatively small expenditures on local parks. But there are also significant improvements being made at the larger parks, including large expenditures at the Miami Metrozoo, Amelia Earhart Park, and Haulover Park. Thirty-six projects are being deleted. Project numbers 9, 10, 18, 19, 20, 22, 28, 92, 100, 113, 120, 129, 132, and 134 have been completed. Project numbers 13, 15, 25, 26, 27, 29, 30, 32, 33, 72, 86, 97, 112, 119, 121, 127, 128, 133, and 136 funding needs are included under the Department's Capital Outlay Reserve (COR) allocation to a single park improvements project (#114). Project numbers 115 and 123 are being deferred for the time being and project #17 is withdrawn due to lack of funding.

The proposed FY 2009-10 capital budget and multi-year plan is 64.9 percent funded by the voter-approved GOB program, about 14.1 percent from Safe Neighborhood Parks Proceeds, 6.1 percent from park impact fees, and 1.3 percent from (COR). The remaining 13.6 percent comes primarily from State and Federal grants and financing proceeds. Of the total ongoing program, about 27.2 percent is devoted to local Unincorporated Municipal Service Area (UMSA) park renovations and new development, most of it to the former. More than 38.9 percent of the program is allocated to Metropolitan or areawide Parks. As a result of the economic downturn, during FY 2009-10, the Department plans to implement only 62 park projects (about half of the projects implemented in the previous year) funded by a combination of Impact Fees, QNIP, and SNP dollars. About 11.0 percent of the expenditures are allocated to various improvements, repair, and maintenance efforts in other park, recreation, and cultural projects.

Seaport

The Miami-Dade County Seaport Department manages and operates the Port of Miami, which is the busiest passenger cruise home port in the world and the 12th ranked busiest containerized cargo port in the United States. The Seaport Department is responsible for meeting the infrastructure needs of the cruise and cargo industries, ensuring the Port of Miami is managed efficiently and effectively, and expanding, renovating, and maintaining the Port's facilities to meet industry growth for both cargo and cruise operations. The Department promotes cruise and cargo growth through infrastructure enhancements and throughput capacity improvements combined with aggressive foreign and domestic marketing program.

The presently adopted (FY 2008-09) Capital Improvements Element contains a Seaport component listing a six-year expenditure program of \$506.60 million and a total cost of \$628.15 million. There are a total of 33 projects. The program is somewhat evenly loaded with 58.3 percent of the total expenditures being planned for the first three years. The single largest project in the FY 2008-09 capital program is dredging the southern part of Lummus Island - Phase III with a total cost of 156.52 million. Other major projects are for the Seaport Tunnel and the new Cruise Terminal A with outlays of \$143.50 million and \$70.00 million, respectively. Together these three projects account for 58.9 percent of the total cost of the program. If capital costs for the Container Yard Improvements – Seaboard were added, just these four projects constitute almost two thirds of the FY 2008-09 capital investments.

In this (April 2009 cycle) recommended Schedule of Improvements, there are 28 ongoing projects with one new project (#34) being proposed, while five are being deleted; project numbers 7, 11 and 31 are listed as deletions from the program due to limited funds and other higher priority Seaport needs. Project #9 is being deleted as grant funding was applied to another project. Project #16 is withdrawn as no longer required at this time.

This 2009-10 capital program embodies continued investment in new and improved berthing, cruise terminal facilities, security, and traffic circulation enhancement and throughput projects. Both the cost and the six-year expenditure figures are lower than those from the previous year.

A number of roadway improvements will be done both on and off the Port. A wide variety of infrastructure improvements have expenditures of \$7.5 million. Likewise, passenger area facilities will be expanded including Cruise Terminals B and C improvements, Cruise Terminals D and E finalization and upgrades for new service, as well as the Parking Garage Terminal D project at a combined cost of \$37.29 million. The largest project in terms of cost is for Phase III Dredging (\$156.29 million) followed by the Port of Miami Tunnel (\$143.50 million). Other general port improvements and channel deepening will also be accomplished. Expenditures for wastewater transmission improvements will be made during 2009-10 as well.

For the entire six-year programming period, the Seaport identifies 29 projects with expenditures of \$473.78 million, mostly funded by Seaport revenue bonds. The total cost of these projects is \$574.57 million.

Sewer Facilities

The Miami-Dade Water and Sewer Department (WASD) is the largest water and sewer utility in the Southeastern U.S. The Department has a major capital program to build and maintain wastewater collection and treatment infrastructure. About 99 percent of the wastewater generated in Miami-Dade County is collected and treated by this agency, utilizing three large regional wastewater facilities with a capacity of 368 million gallons per day. The Department serves approximately 336,290 wastewater retail customers and provides wholesale sewer service to 11 municipalities within Miami-Dade County.

The currently adopted capital schedule (April 2008 cycle) contains expenditures of \$1,851.29 million for the period 2008/09-2013/14, with a total cost of \$3,364.33 million for 33 projects. The 2008-09 program reflected continuation of the major, expedited capital program to meet the requirements and deadlines of two settlement agreements with the Florida State Department of Environmental Protection and two consent decrees with the U.S. Environmental Protection Agency. Almost all of the required improvements have been put in place, except for consent decree projects addressing the collection system, such as pump station improvements and peak flow requirements. During FY 2008-09, the program expenditure total is \$146.16 million. The largest expenditures include \$88.79 million for the South District W.W.T.P. - High Level Disinfection facilities, \$9.51 million for W.W. System Maintenance and Upgrades, \$6.51 million for Sanitary Sewer System Extension, and \$5.58 million the South District W.R.P. Groundwater Recharge, Phase I. These four projects constitute 75.5 percent of the program's first year expenditures.

For the period FY 2009/10 – 2014/15, recommended expenditures total close to \$2.897.68 billion with the total cost at \$4.699.84 billion for 32 active projects, one proposed deletion of a future project (project #31), for which funding has not been identified, and five proposed additions; both the cost and the expenditures levels are higher than the previous year.

Over the course of the 2009-2014 six-year program period, the Water and Sewer Department will continue to pursue a capital strategy aimed at overcoming the deficiencies specified in the Consent Decrees through a series of improvements to the wastewater collection, transmission, treatment and disposal systems. A total of \$337.59 million is programmed for FY 2009-10. Many upgrades go beyond merely correcting the deficiencies identified by the State and federal governments. This is especially true at the Central and South Wastewater Treatment Plants, systemwide peak flow pumping capacity, infiltration reduction, wastewater reuse, corrosion control program, and several

sewer line extensions. Primary funding for the overall program is from wastewater revenue bonds and connection charges.

Solid Waste Disposal

Miami-Dade County's Solid Waste Management Department collects garbage and trash in unincorporated Miami-Dade County and participating municipalities. It contracts for the curbside collection of recyclable materials also. It is responsible for all trash and garbage disposal in the County and also regulates all waste collection, transportation of waste, and recycling. This service system incorporates three regional trash transfer stations, a large resource recovery plant, a shredder facility, two landfills, and thirteen-neighborhood Trash and Recycling centers. A large fleet of trucks and other equipment is maintained in order to carry out these and other activities. For its collection services, the Solid Waste Management Department has completed the conversion from a manual to automated technology.

The existing adopted capital program lists 36 projects costing \$207.07 million, with \$93.85 million to be expended over the 2008/09-2013/14 period. The cost of the program is \$16.9 million below the previous year, but planned expenditures are \$33.64 million higher than the previous program cycle. The Solid Waste Management capital program, guided by the 1995 Strategic Plan, contains projects directed at the broad areas of Environmental Projects, Waste Collection, and Waste Disposal.

The recommended Solid Waste Management Schedule of Improvements for FY 2009/10-2014/15 has cost values lower than the previous year, but the expenditure level is somewhat higher. There are 33 active projects with two proposed additions and three deletions. While total cost is now \$167.66 million, planned expenditures are \$101.92 million. Project numbers 27, 28, and 33 are or will be completed within the fiscal year. The two proposed additions have a total cost of \$3.20 million, the largest project being 2.55 million for a new facility building capital project.

During the first three years of the proposed Capital Program, about 66.8 percent of the program expenditures are devoted to waste disposal environmental projects. These include Resource Recovery Plant (RRP) retrofits, cell closures (at the Resource Recovery Plant, North Dade, South Dade, and Virginia Key landfills) plus other remediation projects. About 21.1 percent of the program is concerned with waste disposal. There are a number of small projects covering the full range of disposal activities. At the Resources Recovery facility, a new cell is planned to be constructed at a cost of \$3.85 million. Another cell (#5) is under construction at the South Miami-Dade facility at a cost of \$12.91 million. Waste collection projects constitute only about 2.8 percent of the program. Major emphasis is being placed on improvements at existing T&R Centers and the construction of a new T&R Center in West/Southwest Miami-Dade. For the most part, these projects will be completed by FY 2010-11 as more than two thirds of the funding are programmed in the first three years of the six-year plan. Major funding comes from waste disposal revenues, followed by Future Solid Waste Revenue Bonds and waste collection revenues.

Traffic Circulation

The Miami-Dade County Public Works Department is responsible for constructing and maintaining the County's roadway and bridge infrastructure system, which totals 662 arterial and 2,649 local centerline road miles, as well as 171 bridges on arterial roads and 33 bridges on local roads. Basically, this includes many of the section-line and most half-section line roads, all collector roads and most of the various bridges in the County. In addition, all local roads in unincorporated Miami-Dade are maintained. Capacity improvements typically consist of widening and/or reconstructing

roadways, replacement of bridges and reconfiguring intersections. Countywide street and roadway signage (2,750 traffic signal controllers, 21,500 streetlights, and 450,000 street and traffic signs) are also this department's responsibility.

The presently adopted (FY 2008-09) Traffic Circulation component of the CIE contained 171 projects totaling \$1,092.20 million in cost. Expenditures of \$801.58 million were heavily programmed during the first three years of the 2008/09-2013/14 period, with 74.7 percent of the outlay found there. The largest category of expenditures was for projects funded by the People's Transportation Plan (PTP) bond program at \$344.38 million, which is 41.3 percent of the total for all projects. Public Works is responsible for carrying out the building of several new roads, widening many others, resurfacing, new operational improvements and new curbs and gutters as set forth in the PTP. The second largest category was for projects funded by Secondary Gas Tax at \$115.58 million, or about 13.9 percent of the total. The third largest category was for projects funded by the new GOB program at \$95.06 million, or about 11.4 percent of the total cost. The projects include unspecified infrastructure improvements in each Commission District, several bike path projects, and a few bridge expenditures. The majority of the other projects was funded by secondary gas tax, and causeway tolls, and was applied to the usual array of road and bridge projects.

During the current year (2008-09), the Department's budget includes funding to maintain 171 bridges on arterial roads and 38 bridges on local roads, 662 arterial and 2,649 local centerline road miles, 2,692 traffic signals and 510 school flashing warning lights, 2,630 traffic signal controllers, 21,500 streetlights on state and County roads, and approximately 450,000 street and traffic signs.

As recommended, the new 2009/10 – 2014/15 program is considerably below the prior year's program and will have a total cost of \$936.01 million for 140 ongoing projects and 17 newly proposed ones. The six-year expenditure plan is for \$660.17 million, which is well below the prior year's program. Thirty-one projects are listed as deletions from the program; project numbers 19, 20, 22, 23, 25, 36, 47, 57, 88, 91, 125, 136, 146, and 170 being completed. Project numbers 43, 162, 164, and 166 are deleted as funding dollars being devoted to other projects. Project #168 is being withdrawn as a duplicate and acquisition of project #73 is being deferred and carried over to FY 2009-10. The remaining projects (numbers 2, 11, 13, 14, 121, 132, 137, 139, 141, 147, and 167) are listed as deletions for several reasons, the most significant due to funding shifts or reprogramming priorities. The new projects have a total cost of \$57.51 million and planned expenditures of \$48.83 million.

This proposed 2009/10 – 2014/15 multi-year Public Works Capital plan is similar to previous versions with inclusion of projects both countywide and in unincorporated Miami-Dade. As it did last year, following its new Business Plan, the Department has segmented the capital program into two parts: Neighborhood and Unincorporated Area Municipal Services, and Transportation. The latter is the largest component, \$828.01 million in cost versus \$259.34 million, while six-year expenditures are \$734.28 versus \$120.74 million. The Transportation part includes Causeway Improvements, Major Road Improvements, Traffic Control Systems, Infrastructure Improvements, and ADA Accessibility Improvements. The Neighborhood and Unincorporated Area Municipal Services part includes Drainage Improvements, Infrastructure Improvements, Mosquito Control (not addressed herein) and Local Road Improvements. In Transportation, the expenditures decrease throughout the six-year programming period, much less so in the Neighborhood/UMSA program, where expenditures decrease in the second through fourth year and then increase for the last two years of the six-year period.

Mass Transit

Miami-Dade Transit (MDT) is the 14th largest public transit system in the country and the largest transit agency in Florida. A large capital program is necessary for the purpose of constructing and maintaining facilities and acquiring equipment necessary to provide transportation services to the public. The transit system has four major components; Metrobus, Metrorail, Metromover, and Special Transportation Services (STS) which is a demand-response door-to-door service. MDT provides 30 million miles of Metrobus revenue service along 95 routes with a fleet of 727 full-sized buses and 139 minibuses, 4 contracted routes, a 22.2 mile elevated Metrorail system, a 20-mile Bus Rapid Transit (BRT) line that is the largest in the United States, and a 4.4-mile elevated Automated People Mover (Metromover) system. The passage by County voters of the one-half cent sales tax in 2002 to be used primarily for transportation provides a dedicated funding source for transportation improvements and is expected to generate more than \$150 million annually, which has opened the door to applying for federal and state matching funds. The various elements were compiled prior to the vote in a document entitled The Peoples Transportation Plan (PTP). MDT, working with the Citizens Independent Transportation Trust (CITT), is in the process of implementing the PTP.

The capital program for FY 2008-09 has total costs of \$6.08 billion and expenditures of \$2.93 billion through the year 2013-14. The single largest component was for the North Corridor Extension of Metrorail. The next highest expenditure was for Capitalization of Preventive Maintenance, then for the Earlington Heights/MIC Connector, Rail Vehicle Mid-Life Rehabilitation, and Bus acquisition. Together, these five projects account for 87.6 percent of the budgeted six-year expenditures. Approximately \$74.33 million was budgeted for the Automated Fare Collection System project for FY 2008-09. The remaining funds in this expanded capital program were used to construct and modify park and ride facilities and for planning, administration, and contingency. Funding comes from federal grants, State of Florida (FDOT) funds, County bonds, and the new surtax supported bonds.

Expenditures for Metrorail include vehicle replacement, repair and maintenance of Metrorail and Metromover facilities, as well as Metromover vehicle replacement. The largest outlay for the bus system is the acquisition of new buses (\$191.80 million). Equipment purchases include a variety of items ranging from the Automated Vehicle Locator/Monitoring and Radio System, tools and equipment for repair, to bus security and surveillance monitoring devices.

The proposed FY 2009-10 capital program consists of 30 active projects, 14 new ones, and eight deletions. A significant amount of reprogramming has occurred resulting in cost and expenditures changes with values well below the prior year program. The cost at \$2.31 billion is almost two-thirds lower than the previous year as is the expenditure level at \$1.73 billion or lower by 40.8 percent. Of the 14 newly proposed projects, the Infrastructure Renewal Plan (IRP) project accounts for 53.2 percent of the total cost. Eight projects are marked as deletions from the program; project numbers 20 and 31 have been completed and project #34 is scheduled to be completed by the end of FY 2008-09. Project numbers 15, 16, 19, 37, and 38 are being deleted due to funding shifts and/or lack of funding. The funding breakdown for the six-year expenditures is as follows: People's Transportation Bond Program \$951.55 million; Federal grants \$540.96 million; and State of Florida-FDOT \$98.24 million. These three sources comprise 93.1 percent of total expenditures. MDT expenditures decrease during the first four years then jump up and increase over the last two.

Water Facilities

The Miami-Dade Water and Sewer Department (WASD) provides portable water to most residents and businesses within Miami-Dade County. Approximately 418,258 water retail customers are served and 13 municipalities purchase water wholesale. This is accomplished by the operation of three regional and five smaller water treatment plants, with water supply coming from 100 water supply wells (grouped into 14 wellfields) in the Biscayne Aquifer. The capital program necessary to accomplish this includes wellfield development, the expansion and upgrade of water treatment facilities, pumping capacity and related infrastructure. The Department implements water conservation measures and provides high quality drinking water. In providing these water services, the Department interacts with and is regulated by various federal and State agencies, the Miami-Dade County Health Department, the South Florida Water Management District, as well as the Department of Environmental Resources Management.

The April 2008-cycle adopted program has 20 active projects costing \$1,271.68 million with \$941.79 million to be spent by FY 2013-14. The total cost figure is very close to the prior year's program, while the six-year expenditures are higher by about 17.4 percent. Several revenue sources were used to fund a variety of water supply and quality projects. However, just six projects, excluding project number 19 and its components, account for about 62.6 percent of the six-year expenditures. These are Safe Drinking Water Act Modifications, Wellfield Improvements, Water Distribution System Extension Enhancements, South Miami Heights Water Treatment Plant and Wellfield, Water System Maintenance and Upgrades, and Water Treatment Plant – Hialeah/Preston Improvements. All of these projects are ongoing with various subcomponents completed each year.

The currently recommended Schedule of Improvements shows both a higher total cost at \$1,674.82 million and higher expenditures at \$1,329.73 million for all the 20 projects. The higher capital outlay predominately accounted for by system wide extensions of the water distribution system and the South Miami-Dade Water Treatment Plant and Wellfield. Project number 19 is being redefined and includes one new component (#19H), one deletion of a completed project (#19B), and a proposed deletion (#19C). Project #19C, Florida Aquifer Blending Wellfield at Hialeah/Preston (4.7 MGD blending) is a project that was included in the County's 20-Year Water Use Permit. A similar project was operational at the Alexander Orr WTP and resulted in significant water quality problems in the distribution system. As a result of the water quality problems, the County obtained approval from the South Florida Water Management District to stop blending at Alexander Orr WTP and to cancel the blending project at Hialeah/Preston WTPs, which was in the procurement process. The District was able to approve these deletions because the County's current demands are significantly lower than what it was anticipated in the permit, as a result of the County's Water Conservation Program.

Like the capital programs before it, this six-year schedule of improvements is aimed at meeting current and future needs for water pumping, treatment, transmission, and distribution capacity. Water quality is given high priority also, as dictated by various federal and State regulations and guidelines.

Monitoring Program

In order to enable the preparation of the periodic Evaluation and Appraisal Report (EAR) as required by Section 163.3191, Florida Statutes (F.S.), the Minimum Criteria Rule (Rule 9J-5, Florida Administrative Code [F.A.C.]) requires that local comprehensive plans contain adopted procedures for monitoring and evaluating the Plan and its implementation (Sections 9J-5.005[1] [c] [5] and 9J-5.005[7], F.A.C.). In addition, successful implementation of level of service standards, and requirements that services be available at the time of development, also require the establishment or enhancement of monitoring and reporting programs.

This section of the Element outlines the substantive aspects of Miami-Dade County's monitoring program pertinent to the objectives, policies and parameters referenced in this Element. It should be understood that the proposed programs or program improvements are continuously refined over time. Undoubtedly, by the time that the next EAR is prepared, the measures and procedures outlined here may have been modified to reflect practical experience.

The administrative requirements for monitoring and preparation of the EAR as outlined in Section 9J-5.005[7], F.A.C. are not repeated here. They are outlined only in the Land Use Element to avoid redundancy. The reader is referred to that Element for a summary of those procedural requirements.

To successfully function in its central role in growth management, the CIE must be periodically evaluated and revised to meet changing conditions. With the capital planning process as outlined in previous sections in place, the monitoring and adjustment of the CIE is essentially automatic and ongoing.

In essence, the County's present Capital Budget and Multi-Year Capital Plan is the basis for the CIE. The annual preparation of the CIP/CIE includes those changes in cost, revenue sources, timing or other allowable modifications. Except under special circumstances, the CIE is amended only at the time of the CDMP biennial or other authorized amendment period. At that time and within that process, the following is accomplished:

- Updating estimates and projections of growth indicators (population, housing, employment, land use, etc.)
- Assessment of existing and projected service levels versus standards.
- Status report on CIE projects (existing, programmed, planned), and assessment of capabilities.
- Determine new or expanded facilities needs.
- Review of fiscal conditions and preparation of updated analyses and forecasts.
- Determine financial needs for unmet facilities and services.
- Determine sources for additional financial support, modify standards to reduce financial obligation, or reduce growth potential.
- Amend CIE as necessary.

A component of the monitoring program is a special review and assessment of the development status and plans for public school and health facilities. Attention is given to this aspect of capital improvements programming in order to determine if there are any unique potential impacts on public infrastructure. Problems should be minimal as Miami-Dade County agencies routinely use projections and other growth indicators which reflect these facilities in terms of location, employment, trip generation and other parameters.

Objective CIE-1

Objective 1 will be evaluated through the use of information compiled in the annual CIE Summary Table.

Objective CIE-2

Objective 2 will be monitored by checking development records from the municipalities in the Barrier Islands.

Objective CIE-3

Concurrency records will be utilized to monitor and evaluate Objective 3.

Objective CIE-4

For each CIE category, the dollar ratio of unfunded projects to the total of both funded and unfunded projects will be tracked and will serve to measure progress on Objective 4.

Objective CIE-5

Objective 5 is basically a regulation, which is controlled by certain processes. These processes consist of the master functional plans from operational departments, the CDMP amendments cycles, the Development Impact Committee reviews, and the preparation of the Capital Improvement Element. Future monitoring of this objective will continue to rely on results of these activities.

Consistency of Projects in CDMP Capital Improvements Schedule with Other CDMP Elements

Miami-Dade County, 2009/10-2014/15

Introduction

Plan amendments are required by Rule 9J-11.007(1) of the Florida Administrative Code (F.A.C.) to be supported by data and analysis. The purpose of this analysis is to address Rule 9J-5.016(4)(a) 1.b, F.A.C., which requires a demonstration of consistency between the Schedules of Improvements in the Capital Improvements Element (CIE) and the individual elements of the Comprehensive Development Master Plan (CDMP). The Florida Department of Community Affairs (DCA) in the 2006 publication, "A Guide to the Annual Update of the Capital Improvements Element," stated that one approach to demonstrating consistency is to cite in the tables of Schedules of Improvements the policy, table or page in another element that would identify a project as a deficiency, replacement project or designed to meet a future need. Another approach, as addressed in a CIE training workshop on August 16, 2007, is to determine if the project generally implements the goals, objectives and policies of the CDMP by citing the comprehensive plan reference relevant to the project in a supporting document.

The Department of Planning and Zoning (DP&Z) in the data and analysis report for Application No. 7 is utilizing the second approach. For each project in Tables 2 through 12 in the Schedules of Improvements, the data and analysis report identifies the provision in an element such as an adopted goal, objective, policy, table or figure that either supports the project, or is implemented by the project. While several provisions in an element or several elements may be applicable to a project, only the most relevant provision is identified in this report. For each table in the Schedules of Improvements, projects will be grouped by the most relevant CDMP provision (See "Consistency of Projects in CDMP Capital Improvements Schedule" Table below). As an example, if policy TC-1B in the Traffic Circulation Subelement were the most relevant provision for roadway projects 1 through 17 in Table 10 (Traffic Circulation), those projects would be listed with that policy in the review section for Table 10 in the data and analysis report.

A demonstration of consistency with other CDMP elements has been prepared for only the new projects (added to Capital Improvements Schedule after April 07 Amendment Cycle) identified in the Schedules of Improvements. This approach is consistent with Rule 9J-11.007(2), F.A.C., which allows local governments to make a reference to previously submitted data and analysis on which it relies on to support an amendment.

Notes * All revenues represent existing fund balances and committed revenue sources, as well as existing committed bond proceeds from prior/current year issuance and future bond proceeds anticipated to be realized upon issuance. Bond proceeds represent payments from existing committed revenue sources estimated by forecast or projection.

** All revenues from "Developer Fees/Donation" are considered committed revenues as indicated by the enforceable development agreements. Noted above are the Declaration of Restrictions (covenants) and DRI-Development Order (DO) and the corresponding Recording number and Resolution number correlating to those projects.
